Europe style for Shenzhen Plastic Film -Top-Rated Product! DC24V Electric Film Reeler Roll Up Units Winch Geared Motor for Poly Film Greenhouse Ventilation -Fenglong Greenhouse

What is Electric Film Reeler?

Electric Film Reeler, also known as Geared Motor or Electric Roll Up Units, is widely used in poly greenhouse or livestock. Through opening or closing the greenhouse film by Electric film reeler, it allows you to properly control your greenhouse easier, like the ventilation, shading, humidity, air exchange and temperature. it is absolutely the trend for polyethylene greenhouse ventilation. It saves the man power and is quick to achieve ventilation and closing of the polyethylene coverings especially for multi span greenhouses.

Exported To 48 Countries:

Fenglong Kingzo® Electric Film Reeler has been serving customers in 48 countries since 2003.

Development history of Electric Film Reeler

1) In 2003 the electrical film reeler was invented produced by Beijing Fenglong.

2) in 2006 the reelers were exported to Japan, USA, and more than 20 other countries.

3) in 2008 Japan bought 5000-10000 sets of reelers every year.

4) in 2013 Kingzo AC 220 reeler was invented, which was a technical innovation.

5) in 2017 film reelers sales qty has surpassed 80000 sets, and annual capacity is 150000 sets.

Continuous optimization, Scientific Streamline Design

Low Noise and Big Torque

Easy to Install and Operate

Overload-proof

When the load is 1.5 times the rated torque, the overload protection device will start, the motor will stop, after 5-6 minutes, the motor will restart, this will prevent the motor from burning down.

Double Limit Switch Protection

Accurate limit switch and low failure rate, failure rate is less than 0.5% within 5 years

Ingress Protection Grade: IP55, Anti-condensation added to protect the safety of circuit diagram

Various Power and Torque for Choosing

Product Code	Model	Voltage	Power	Torque	Current	Velocity		-	Output Shaft Diameter		Weight	Guarantee
