BEIJING FENGLONG  
GREENHOUSE  
TECHNOLOGY CO., LTD.

*Innovation Dedication Reliability Credibility*

# Company Profile

Beijing Fenglong Greenhouse Technology Co., Ltd. was founded in 1999, our factory is located in the Tongzhou District of Beijing and occupies more than 40,000 square meters. We employ more than 200 people across three R&D centers, three national offices and four distribution centers. We have three main series products, including polymer materials, electromechanical equipments and greenhouse automatic control system. Our products have been exported to more than 64 countries worldwide including Japan, the United States, Israel, and Europe etc.

Beijing Fenglong maintains long-term business alliances with Japan Mitsui Chemicals, Japan KYOWA, Japan C.I. TAKIRON, Institute of Chemistry Chinese Academy of Sciences and Chinese Academy of Agricultural Sciences.

With that, Beijing Fenglong has introduced advanced Japanese production technologies and management concepts, the company has in place a very strict quality control system, certified by ISO9001 quality management system, ISO14001 environmental management system, and GB/T28001 health and safety management, ensure that all the qualified products are strictly inspected and traceable, we believe we can provide better products and services to major domestic and foreign engineering companies and growers.

We are deeply indebted to our customers and suppliers for their continuous support. We are always committed to delivering to our customers the best.

### TOYOTANI® Polyethene Film Introduction

▲ Factory Overview

Beijing Fenglong maintains long-term business alliances with Japan Mitsui Chemicals, Japan KYOWA, Japan C.I.

TAKIRON, Institute of Chemistry Chinese Academy of Sciences and Chinese Academy of Agricultural Sciences.

TOYOTANI® Polyethene film uses advanced Japanese Mitsui Technology and unique formulation. It is multi-layer film, the efficient functional additives are added into different layer. The top layer, which is facing the sky, is for anti-static and UV Stabilization, middle layers are for IR or Thermic and the inner layer, which is facing the plants, is mainly for the anti-mist and anti-drip.

TOYOTANI® Polyethene Film, accurate thickness, no recycling material, adding the Metallocene with higher proportion to make sure the film has high light transmission and tensile strength. We complete them in Tongzhou Factory from the materials production to finished goods. We test every batch of film with imported Q-Lab QUV Spray (USA) to ensure the quality consistency.

Greenhouse Covering Film

02

# TOYOTANI® Clear Film

Crystal Clear/ High Strength/ Better Thermicity/ Anti-Drip& Anti-Mist/ Long Duration

01

## 2/ Features of TOYOTANI® Clear Film

- **Long Duration**

Temperature-resistant, Cold-resistant, UV Stabilization, Cost Effective.

- **High Strength**

The strength can reach twice the national standard, enhanced loading capacity.

- **Crystal Clear**

Superior performance of transparency, light transmission rate is over 90%, 3-5% higher than similar products, the higher transmission rate ensure adequate lights, which can be absorbed by plants.

- **Better Thermicity**

Including Ethylene Vinyl Acetate in the mixture in high quantities (EVA), using of Mineral Additives and Synthetic IR additives, the IR additives absorb most of the longwave IR radiation from the greenhouse, reducing heat loss, improving the film thermicity.

- **Anti-Drip& Anti-Mist**

Anti-Drip additives reduce surface tension of condensing water vapor and raise the surface tension of the inner side of plastic.

# TOYOTANI® Diffused Film

High Yield/ Enhanced color/ Crystal Clear/ Insolation Prevented

## 3/ TOYOTANI® Diffused Film Introduction

The incident light can reach the plant as “direct” radiation (waves moving parallel to one another) or as “Diffused” radiation (in which the light waves are moving along trajectories which are at various angles with respect to one another and to a horizontal plane).

Diffused film has an advantage over clear film. Diffused light does not allow the shadow formation of the top layers of leaves to prevent essential light from reaching the lower leaves. The end result is the facilitation of an effective dispersion of total light to the darker areas inside the plant volume enhancing photosynthesis and hence the production of biomass. (As Figure 1)

### Why choose diffused film:

- The diffused film is very popular all over the world, which is widely used in France, Spain, Israel, Turkey, Australia, African countries etc., because the diffused film with uniform distribution of light is good for the plant's photosynthesis.
- It is proved by experiments that, regardless of planting cucumber, tomato, or flowers, the diffused film can increase the yield of them.
- The increased yield percentage is as follows:  
Cucumber(4-10%), Tomato(8-10%), Mixed Sweet Pepper(5%), Anthurium (25%). This increased yield is caused by the lights of diffused film, the diffusion lights are going to all parts of plant, making the photosynthesis more sufficient.

Figure 3

# TTPO® Multi-span Greenhouse Film

No Water-bag/ Crystal Clear/ High Strength/ Dust-free/ Anti-algae/ Pesticide Resistance

01

## 4/ TTPO® Multi-span Greenhouse Film Introduction

PO film is a kind of agricultural film produced by using raw materials of advanced olefin and other auxiliaries, and using external spray drying process.

### Features

#### Ultra-long Life

Thickness of 0.15mm, 5 years guarantee

#### Crystal Clear/ High Strength

Sufficient light, growth promoting, anti-aging, high strength

#### Specially For Multi-span greenhouse

no deformation on the shed, no water-bag in use

#### Dust-free/ Anti-algae/ Pesticide Resistance

Effective dust and algae control, pesticide resistant, longer life

### Basic Performance

Ultra-transparent/ High insulation/ Long-lasting anti-drip and mist-elimination  
ultra-high strength/ long life

# BHB®White-black-white Greenhouse Film

## 5/ BHB®White-black-white Greenhouse Film

### Features:

Shading 100%/ anti-aging, long life/ heat preservation in winter, cooling in summer /energy saving, improving the utilization of light and heat energy

No	Product	white-black-white	black-white	Reason	Diagrams
1	Shading	100%	100%	★The white surface reflects the sun's rays ; ★The black side blocks light transmission.	
2	Winter Insulation	Normal	Good	★The white inner layer of the White-black-white film blocks heat penetration for better insulation.	 Arrows are internal heat
3	Summer Cooling	Good	Better	★The white surface reflects the sun's rays and reduces heat absorption. The double layer of white reflects better.	 Arrows are external heat
4	Life	Better	Good	★Aging is caused by UV rays, the white layer inside and outside reflects light, reducing UV penetration and slowing down aging.	 external light internal light
5	Energy saving	Yes	No	★White-black-white film with white inner layer reflects light and blocks heat penetration to improve light and heat utilization	 Arrows are internal light and heat

# TOYOTANI® Black-white Film

Sun protection/ insulation/ blackout/ cool down

01

## 6/ TOYOTANI® Black and White Film Introduction

Black and white film is a kind of film which is white outside and black inside, and has the effect of total blackout.

### Features :

- The white side reflects the sun's rays and reduces heat absorption; the black side blocks the light transmission and cuts off light efficiently; it can effectively reduce the temperature by 5-10 degrees inside the shed in summer. In winter, it can reduce the heat dissipation in the shed or greenhouse.
- Excellent anti-aging performance, longer service life compared to traditional covering materials such as shade net, grass curtain, felt, etc.
- Stronger mechanical properties, strong wind resistance, less deformation, less water and snow accumulation
- It can effectively protect the facilities in the shed from the external environment, prolong its service life, and save more usage and labor costs.
- Beijing Hong Leong has a joint venture with a Japanese company for 20 years. The quality control management technology is all from Japan, and the quality is fully controllable.

### Application of black and white film:

- Breeding: edible mushroom greenhouse, silkworm greenhouse, livestock and poultry farming greenhouse, aquaculture greenhouse, etc.
- Planting: flower shading, light cutting (to adjust the flowering period), etc.
- Others: silage, forage preservation, greenhouse building outer cover, agricultural products fresh storage (such as potatoes), hydroponic impermeable layer, etc.

## 14/ Advantages of TOYOTANI® Greenhouse Film

- Formulation: introduced from Japan, unique performance, and excellent quality.
- 100% new material: never add recycling material, stable and high quality.
- Longer life, pesticide resistant: the original Q-lab aging tester from the United States, regular testing, guaranteed life.
- Severe management: the introduction of Japanese quality control management technology, from the manufacture of masterbatch to the production of finished products, all completed in our Tongzhou production base under the whole control.

01

### Enhanced Strength

### High Light Transmission

Time-varying table of attenuating of transmission rate

### Longer Duration

## 15/ Film Selection, Installation guidelines

- The area, with big temperature difference between day and night, is suitable for the high-thermicity and high-transmission film.
- The area with strong sunshine is suitable for the high diffusion film.
- The function of two sides of the film is different, please install the film according to the prints and labels.
- Avoiding thermal expansion and contraction, install the greenhouse in the morning or evening, tighten the film in winter, and loosen it in summer.
- Do not spray the chemicals onto the film, and also do not use the Sulfur Burner inside the greenhouse, because this will accelerate the aging process.
- Avoid direct touching with the plants, equipment of irrigation and heater, etc.
- Store the film in a dry shading place within 6 months before installing.

# Electric Film Reeler

## Introduction of Electric Film Reeler

Key Words	National electric film reeler standard setter, 17 years of experience, Exported to more than 60 countries.
Specification Series	KINGZO®, and TOUP®, Two Major Brands 40W-300W
Function Series	Sidewall/Roof Film Rolling, Two Sides Film Rolling 8m screening/ over 4m height of film rolling, manual release, with locking device (TOUP®)

02

### Definition

Electric film reeler is essentially a gear motor with a limit switch, low cost, flexible control, maintenance-free, easy to maintain, the current market of the electric film reeler is DC24V power supply drive, motor power is between 40W to 120W, the no-load speed of output shaft is about 3.6pm. Beijing Fenglong is the first company to develop and launch AC220V electric film reeler.

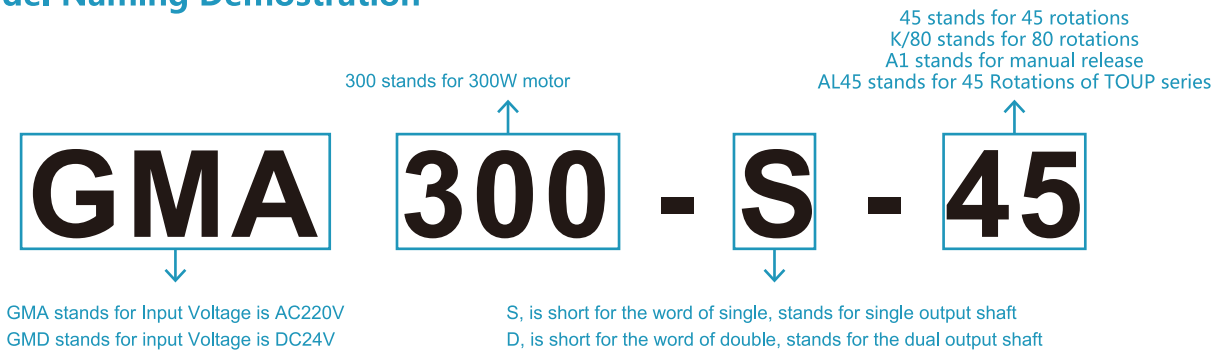

### Application

Mainly used in film greenhouse and livestock, including film rolling, curtain rolling, screening, etc. Works as a temperature regulator, ventilator, light control, etc.

### Development History Timelines

- 2003 Beijing Fenglong researched and developed the Kingzo® DC electric film reeler
- 2006 Kingzo® Electric film reeler started to export to more than 20 countries such as
- 2008 Exported of electric film reeler to Japan reached 5,000-10,000 units
- 2013 Kingzo® 220V AC electric film reeler launched, brought a technological innovation
- 2015 The industry's first large-distance (80 Rotation) electric film reeler specifically for curtaining
- 2017 Became the first one to set the industry standard for electric film reeler
- 2018 First to launch a distance high precision (12 Rotation) electric film reeler specifically for window opening
- 2020 First to launch the TOUP® electric film reeler with locking device, solving the unbalanced problem of electric film reeler

### Model Naming Demostration

# KINGZO®

## Introduction of GMA/GMD Electric Film Reeler

### 1/ Introduction of Kingzo® GMA Series

- Directly connected to AC 220V power supply, no need to convert power or transformer, convenient and cost saving
- 360 degree rainproof, no water accumulation at any angle
- Anti-misconnection, anti-overload protection, with electrical-leakage protection
- Easy and reliable limit positioning, high precision, good self-locking performance
- Low noise, high torque, super power saving
- Reinforced output shaft end, strong and durable
- Three years guarantee for the whole machine, five years failure rate of less than 5%
- With anti-condensation drainage holes, protection level IP5 (dustproof and waterproof)
- Provide 5m external power cable, convenient to connect to the control box

### 2/ Introduction of Kingzo® GMD Series

- 360 degree rainproof, no water accumulation at any angle
- The motor comes with anti-overload and anti-blocking protection function
- Double limit design, to protect the safety of the travel system
- Easy and reliable limit positioning, good self-locking performance
- Low noise, high torque, power saving
- Reinforced output shaft end, strong and durable
- Three years guarantee for the whole machine, five years failure rate of less than 5%
- With anti-condensation drainage holes, protection level IP5 (dustproof and waterproof)
- Provide 5m external power cable, convenient to connect to the control box
- DC 24 safety voltage, no need to worry about the safety of electricity

## KINGZO® Electric Film Reeler

### 1/ KINGZO® Electric Film Reeler GMA60-S

#### Product Description

- Anti-misconnection, anti-overload protection;
- Reinforced output shaft;
- Low noise, big torque;
- Accurate limit switch and reliable self-locking property;
- Powered by AC220V/AC110V, no need transformer, more convenient to install, lower cost;
- Three water drain holes of anti-condensation added to protect the safety of circuit diagram, Protection Grade: IP55;
- Reinforced output shaft;
- Providing 3 meters long external electric cable for easy connection to the control box;
- 3 years quality guarantee.

02

Product Code	Model	Voltage ( V )	Power ( W )	Torque ( N.m )	Current ( A )	RPM ( r/min )	Rolling Height	Rolling Length	Output Shaft Diameter	Rolling Pipe-OD	Weight ( Kg )	Guarantee ( years )
110431000010	GMA60-S	AC220	60	60	0.5	2.8	45	≤85m	Φ27.5orΦ33.5	Φ22orΦ27.5	3.7	3

2/ KINGZO® Electric Film Reeler GMA100-S

Product Description

- Anti-misconnection, anti-overload protection ;
- Reinforced output shaft;
- Low noise, big torque;
- Accurate limit switch and reliable self-locking property;
- Powered by AC220V/AC110V, no need transformer, more convenient to install, lower cost;
- Three water drain holes of anti-condensation added to protect the safety of circuit diagram, Protection Grade: IP55;
- Reinforced output shaft;
- Providing 3 meters long external electric cable for easy connection to the control box;
- 3 years quality guarantee.

3/ KINGZO® Electric Film Reeler GMA100-S-80

Product Description

- Longer rolling height, 8 meters;
- Anti-misconnection, anti-overload protection;
- Reinforced output shaft;
- Accurate limit switch and reliable self-locking property;
- Powered by AC220V/AC110V, no need transformer, more convenient to install, lower cost;
- Three water drain holes of anti-condensation added to protect the safety of circuit diagram, Protection Grade: IP55;
- Reinforced output shaft;
- Providing 3 meters long external electric cable for easy connection to the control box;
- 3 years quality guarantee.

4/ KINGZO® Electric Film Reeler GMA120-S-A1

Product Description:

- Manual releasing function, working during power failure;
- Anti-misconnection, anti-overload protection ;
- Reinforced output shaft;
- Accurate limit switch and reliable self-locking property;
- Powered by AC220V/AC110V, no need transformer, more convenient to install, lower cost;
- Three water drain holes of anti-condensation added to protect the safety of circuit diagram, Protection Grade: IP55;

## KINGZO® Electric Film Reeler

### 1/ KINGZO® Electric Film Reeler GMD60-S

02

#### Product Description

- Low noise, big torque;
- Double limit switch protection;
- Accurate limit switch and reliable self-locking property;
- Three water drain holes of anti-condensation added to protect the safety of circuit diagram, Protection Grade: IP55;
- Reinforced output shaft;
- Providing 5 meters long external electric cable for easy connection to the control box;
- 3 years quality guarantee.

Product Code	Model	Voltage ( V )	Power ( W )	Torque ( N.m )	Current ( A )	RPM ( r/min )	Rolling Height	Rolling Length	Output Shaft Diameter	Rolling Pipe-OD	Weight ( Kg )	Guarantee ( years )

3/ KINGZO® Electric Film Reeler GMD100-S-80

Product Description

- 8 meters long for screening, 4m high for film rolling;
- Low noise, big torque;
- Double limit switch protection;
- Accurate limit switch and reliable self-locking property;
- Three water drain holes of anti-condensation added to protect the safety of circuit diagram, Protection Grade: IP55;
- Reinforced output shaft;
- Providing 5 meters long external electric cable for easy connection to the control box;
- 3 years quality guarantee.

6/ KINGZO® Electric Film Reeler GMD300-S

Product Description:

- Suitable for greenhouse quilt rolling, poultry curtain;
- Replace big torque gear motor, economical, easy to adjust the limit switch and install, small size;
- Double limit switch protection;
- Three water drain holes of anti-condensation added to protect the safety of circuit diagram, Protection Grade: IP55;
- Providing 5 meters long external electric cable for easy connection to the control box;
- 3 years quality guarantee.

# TOUP®

# Electric Film Reeler

## 1/ TOUP® Electric Film Reeler

02

### Product Description:

- Prevent the film from being damaged by the vertical head of the electric film reeler
- The rolling tube is more straight, to protect the head film and extend the life of the film
- No need the climb pipe, the whole structure is more compact
- To install at left or right side according to the relative position of climbing pipe and rolling pipe
- No need the Guiding Bracket
- 3 years quality guarantee

## 6/ Schematic Diagram of KINGZO® Electric Film Reeler

### Schematic Diagram 24V

### Wiring Diagram 24V Reeler

### Schematic Diagram 220V

Notice:

1. All power distribution devices MUST be selected and installed by professionals.
2. In order to use the electricity safely, the terminal box of the reeler should be connected with the grounding cable reliably.
3. After the cables are connected, the water clog in the terminal box and the lid of the waterproof box should be sealed tightly to prevent rain from entering.
4. 5 units or less can be used in parallel, if there are more than 5 units in parallel, electrical control devices should be added, and each electrical control device should not have more than 5 units in parallel.

## 7/ KINGZO® Electric Film Reeler Limit Switch Illustration

### Limit switch adjusting

1. Loosen the left and right lock bolts by a crosshead screwdriver, at the same time make sure the gear pin doesn't touch the microswitch.
2. Turn on the power, and make the motor run, confirm the status of the rolling pipe, it is rolling up or rolling down.
3. When the motor is rolling up the plastics, rotate any of the knobs slowly, and make the gear pin touch the microswitch(with click sound). If the motor stops running, it means this adjust pin controls the direction of the rolling. If the motor doesn't stop running, the other adjust pin is used to control the direction of the rolling.
4. When the motor is rolling up the plastics, the pipe arrives at the required position, at this time rotates the knob which controls the tolling status and makes the gear pin touch the microswitch (with click sound), hold on and fasten the lock bolt by a crosshead screwdriver.
5. When the motor is rolling down the plastics, the pipe arrives at the required position, at this time rotates the knob which controls the tolling status and makes the gear pin touch the microswitch (with click sound), hold on and fasten the lock bolt by a cross head screwdriver.
6. The above steps would set up the motor's limit range. Turn on the power and check if the range set up is right. If it is not correct, please review the manual carefully and do the setup again.

### 3/ Switch Box for Electric Film Reeler Switch E300-A220V

#### Product Description

- Working Voltage: AC 220V;
- Working Current: 2A;
- Overload protection for reeler was built-in and reversing switch was external, to control the reeler forward, reversal and stop;
- Easy to install, the wiring is easy and reliable, no power consume.
- 1 year quality guarantee

#### Notice

- Please connect the control box to reeler according to the diagram;
- Ensure keeping the water-proof and seal after installation;
- Only adopt to AC 220V reeler and only control 1 piece reeler;
- MUST connect the power with ground protection.

Wiring Diagram

02

### 4/ Control Box Customized for Reeler 24V

#### Product Description

- The electric film reeler capacity of each channel is 60W, each channel equips protection fuse;
- Each channel equips one toggle switch to operate the open, close and stop;
- The FLC® control box supplies single phase 220V/50Hz power;
- The earth wire is required, the earth wire must connect safety with the ground point of control box.
- 1 year quality guarantee

Control Box Customized for Reeler 24V ( outside )

#### Notice

- Ensure output terminal function when install the control box wiring, wrong wiring is forbidden;
- Each reeler channel equips overloading and fuse short, please check the fuse if the reeler does not work;
- Each channel equips one piece reeler, please do not connect more reelers;
- The installation and distribution of control box MUST be operated by professional.

Control Box Customized for Reeler 24V ( inside )

19 pieces	DC119	DC219	DC319	DC419
20 pieces	DC120	DC220	DC320	DC420

Remarks: 1. Models Selection: Supposing the reeler quantity is 17 pieces and one channel controls 3 pieces reeler, the right control box is horizontal 3 and vertical 17, the model No. is DC317.

2. The sheet data is created according to 100W reeler. Considering the power limit, so one control box equips 20 pieces reelers max.

## 6/ Control Box Customized for Reeler 220V

### Product Description

- The electric film reeler capacity of each channel is 400W, each channel equips protection fuse;
  - Each channel equips one toggle switch to operate the open、close and stop;
  - The FLC® control box supplies single phase 220V / 50Hz power;
  - The earth wire is required, the earth wire must connect safety with the ground point of control box.
  - 1 year quality guarantee
- 
- Ensure output terminal function when install the control box wiring, wrong wiring is forbidden;
  - Each reeler channel equips overloading and fuse short, please check the fuse if the reeler does not work;
  - Each channel equips two piece reelers, please do not connect more reelers;
  - The installation and distribution of control box MUST be operated by professionals.

02

3/ Model Naming Demostration

S stands for Sidewall, A stands for high position, SA stands for Sidewall at high position

BN is first Capital, stands for series model

105 stands for speed ratio of 5:1  
107 stands for speed ratio of 7:1

# FLC®/ TANIKANKIT®

## Manual Film Reeler Introduction

### 1/ FLC® BS104 Manual Film Reeler

02

#### Product Description

- Easy to install and operate;
- Big output torque and light weight;
- Side ventilation for greenhouse;
- Accurate limit range and reliable performance of self-locking;
- Wide application for greenhouse, livestock, etc.;
- Stainless steel handles, full plastic resin casing, long anticorrosion time;
- 3 years quality guarantee.

Product Code	Model No.	Torque	Speed Ratio	Rolling Length	Application	Size of Rolling Tube	Size of Guiding Tube	Guarantee
110202100010	BS104	30N·m	4:1	≤90m	Sidewall	Φ22 or Φ27.5	Φ27.5	3 years

#### FLC® BS104 Manual Film Reeler Application

2/ TANIKANKIT® NA104 Manual Film Reeler

Product Description

- Easy to install and operate;
- Big output torque and light weight;
- Side & roof ventilation for greenhouse;
- Reliable performance of self-locking;
- Wide application for greenhouse, livestock, etc.;
- Stainless steel handles, full aluminum shell, long anticorrosion time;
- 3 years quality guarantee.

02

Product Code	Model No.	Torque	Speed Ratio	Rolling Length	Application	Size of Rolling Tube	Size of Guiding Tube	Guarantee
110101100010	NA104	30N·m	4:1	≤100m	Sidewall and Roof	Φ19 or Φ22 or Φ27.5	Crank rod Φ22 or Φ27.5	3 years

TANIKANKIT® NA104 Manual Film Reeler Application

3/ FLC® NS105 Manual Film Reeler

Product Description

- Easy to install and operate;
- Big output torque and light weight;
- Side ventilation for greenhouse;
- Reliable performance of self-locking;
- Wide application for greenhouse, livestock, etc.;
- Suitable for  $\Phi 22$  or  $\Phi 27.5$  rolling tube;
- 3 years quality guarantee.

Product Code	Model No.	Torque	Speed Ratio	Rolling Length	Application	Size of Rolling Tube	Size of Guiding Tube	Guarantee
110200400010	NS105	50N·m	5:1	≤100m	Sidewall	$\Phi 22$ or $\Phi 27.5$	$\Phi 27.5$	3 years

FLC® NS105 Manual Film Reeler Application

4/ FLC® NSA105 Manual Film Reeler

Product Description

- Easy to install and operate;
- Add the transition gear in the transmission system with more steady performance;
- Big speed ratio and output torque, light weight;
- Reliable performance of self-locking;
- Side ventilation for high position;
- 3 years quality guarantee.

02

Product Code	Model No.	Torque	Speed Ratio	Rolling Length	Application	Size of Rolling Tube	Size of Guiding Tube	Guarantee
110200600010	NSA105	40N·m	5:1	≤100m	Sidewall for high position	Φ22 or Φ27.5	Φ27.5	3 years

FLC® NSA105 Manual Film Reeler Application

5/ FLC® NA105 Manual Film Reeler

Product Description

- Easy to install and operate;
- Add the transition gear in the transmission system;  
with more steady performance;
- Big speed ratio and output torque, light weight;
- Wide application: besides greenhouse vent, it also can be  
used for ventilation driven by rack and pinion system by hand in small area;
- Reliable performance of self-locking;
- Suitable for Φ22 or Φ27.5 rolling tube;
- 3 years quality guarantee.

Product Code	Model No.	Torque	Speed Ratio	Rolling Length	Application	Size of Rolling Tube	Size of Guiding Tube	Guarantee
110200200010	NA105	50N·m	5:1	≤100m	Roof	Φ22 or Φ27.5	upper pipe Φ22 or Φ27.5 lower pipe Φ27.5 or Φ33.5	3 years

FLC® NA105 Manual Film Reeler Application

6/ FLC®BS107 Manual Film Reeler

Product Description

- Easy to install and operate;
- Add the transition gear in the transmission system with more steady performance;
- Big speed ratio and output torque, light weight;
- Suitable for side curtain vent of livestock especially;
- Reliable performance of self-locking;
- Side ventilation for greenhouse;
- 3 years quality guarantee.

FLC® BSA107 Manual Film Reeler Application

8/ FLC® BA107 Manual Film Reeler

Product Description

- Big output torque and longer rolling length;
- Easy to install and operate;
- Self locking at two directions, safe and reliable;
- Suitable for various film rolling and screening vent in livestock, especially for the roof vent in greenhouse;
- 3 years quality guarantee.

Wiggle Wire Channel

# VINIPET® Wiggle Wire

Japanese Standard, Japanese Production Line,  
Eight Procedures of Inspection; Anti-fake stripes,  
Thicker ends of wire, Economical and Safe.

## 1/VINIPET® Wiggle Wire Introduction

VINIPET® Wiggle Wire was originally designed and manufactured for exporting to Japan according to Japanese standard. With eight inspection procedures(Figure 1), it is made of specialized spring wire, coated by the anti-aging resin for many years, produced under strict management system, it has been exported to Japan for 16 years.

VINIPET® Wiggle Wire has B5 and B6 two series of products, including VINIPET®B623H (Blue, 6 years guarantee), VINIPET®B5B (White, 5 years guarantee), VINIPET®B6B (White, 6 years guarantee), thicker and rounded ends, PVC coating design, can be repeatedly used for 6 - 8 years.

**Figure 1**  
**Eight Inspection Procedures**

### 1. Inspection of Steel Wire

Wire Diameter: 2.30mm  
Diameter after Coating: 2.85mm  
Tensile Strength > 1800N/mm<sup>2</sup>

### 2. Inspection of Plastic Powder

8 terms of technical specification inspection  
Inspected by American Q-Lab  
UV testing machine

### 3. Inspection of Shaping product Dimension

Length: 1955mm  
Height: 36mm

### 4. Inspection of End product Dimension

Length: 1955mm  
Height: 36mm

### 5. Inspection of Elasticity

Taking a sample of 275mm  
length wiggle wire with a load  
20kg weight, the difference is  
less than 15mm.

### 6. Inspection of Appearance

No scratch and no deformation

### 7. Inspection of flatness and distortion

Glancing flatness < 20mm  
Torsion resistance < 30mm

### 8. Inspection of finished products

Comprehensive evaluation of  
Length, Height, Weight, Diameter,  
Appearance and package

## 2/The Advantage of VINIPET® Wiggle Wire

### ● Economical

- Due to the aging and cracking of the outer PVC coating resin, the common wiggle wire in the market will be rusted out in less than two years and cannot be used repeatedly.
- VINIPET® Wiggle Wire is made of spring steel wire, coated with UV resin, can be used 6-8 years repeatedly. So it is real cost-saving.

### ● Safety

- The proportion of wiggle wires in the cost of the whole greenhouse is less than 1%. It is this 1% of wiggle wires that guarantees 100 % safety of greenhouse film.
- In recent years, 2-5 years warranty film is widely used, but the common wiggle wire with it is easy to rust and break down at any time. VINIPET® Wiggle Wire, coated by premium engineering plastic powder with UV stabilization, can withstand 14-grade wind. The film-fixing ability is stronger.
- Common wiggle wire's ends are too sharp, and it is easy to puncture the film, while VINIPET® Wiggle Wire's ends are thicker and rounded, ensuring easy and faster installation while simultaneously preventing tears.

### ● Quality Guarantee

From purchase date, within the warranty period, FLC would do full compensate or replace them due to quality problems.

### ● Testing of simulated wind pressure

Test Method: The test area is 1 square meter, the two sides of the film are fixed in the wiggle wire channel with VINIPET®6 wiggle wires.

Test Result: The maximum load-bearing capacity is 580kg, and the average load-bearing capacity of each wiggle wire is 290kg. (Considering the safety factor of twice, the load-bearing of 14-grade wind is about 133kg per square meter, the wiggle wire which withstands 14-grade wind should bear more than 260 kg load per square meter)

### ● Comparison of wiggle wire flatness

Other Brands Wiggle Wire  
VINIPET® Wiggle Wire

It is proved that VINIPET® B6 wiggle wire distort less than common one when they are taken out of wiggle wire channel.

## VINIPET® Wiggle Wire

# VINIPET® B623H Wiggle Wire

### 1/VINIPET® B623H Wiggle Wire

#### Production Description

- Four black stripes as anti-fake mark;
- Thicker and rounded ends to protect film and ensure easier and faster installation;
- Made of galvanized steel wire and coated by UV resin, repeated to use 6-8 years;
- 6 years quality guarantee.

Product Code	Model	Specification	Color	Anti-fake Mark	Treatment	Guarantee

# VINIPET® B5B Wiggle Wire

## 3/ VINIPET® B5B Wiggle Wire

### Product Description

- Thicker and rounded ends to protect film and ensure easier and faster installation;
- White color generally absorbs very little heat, to lengthen the lifetime of film;
- 5 years quality guarantee.

Note: B5B White wiggle wire uses white plastic powder made of special formula, the Elongation At Break has been increased by 30%-50% than the black plastic powder, therefore, the white wiggle wire has longer life than black wiggle wire.

Product Code	Model	Specification	Color	Anti-fake Mark	Treatment	Guarantee
120504900010	B5B20H	Φ2.0	white	four blue stripes	full coated	5 years

## 4/ VINIPET® Wiggle Wire Application

03

LOCKUP®

Wiggle Wire Channel

1/ LOCKUP® Galvanized Wiggle Wire Channel

Product Description

- Made of steel sheet from “Shougang Group”;
- Thick Zinc Coating, Long time of anti corrosion;
- Scientific design of inside angle.

Principle of Wind-resist

When the wind acts on film, the force is transferred to the wiggle wire, according to the force theory, if  $\alpha < \beta$ , the channel will lock the wiggle wire and the wiggle wire will move downwards; if  $\alpha > \beta$ , the wiggle wire will move upwards.

When the wind-resist LOCKUP® wiggle wire channel is used with wiggle wire, as  $\alpha < \beta$ , the more wind loading, the more force to go downwards. It is hard to collapse. On the contrary, for the common and U shape wiggle wire channel,  $\alpha > \beta$ , so the more wind loading, the more force to go upwards. It is hard to collapse.

diagram of wind-resist principle

Model	Specification	Width(mm)	Height(mm)	Thickness(mm)	Zinc Coating	Length(m/pc)
KF-3B ( 120 )	Common	30	11	0.70	≥120g/m <sup>2</sup>	4m/6m

## Greenhouse Ventilation and Screening

### Ventilation and Screening System

1. Continuous Rack and Pinion Ventilation System
2. A Type Rack and Pinion Screening System
3. Cable Driving Screening System

### Gear Motor

1. 3GG® Gear Motor
2. KINGZO® Gear Motor

### Accessories for Ventilation and Screening System

1. Accessories for Continuous Rack and Pinion Ventilation System
2. Accessories for A Type Rack and Pinion Screening System
3. Accessories for Cable Driving Screening System
4. Accessories for Economical Screening System
5. General Accessories for Screening System

# Greenhouse Ventilation and Screening System Installation Diagram

## 1/ Continuous Rack and Pinion Vent System

### Installation Diagram

- Continuous vent system consists of vent gear motor, drive shaft, rack and pinion and shaft bearing. The gear motor drives the pinion by the drive shaft to move the rack back and forward to open or close the vent.

## 2/ A Type Rack and Pinion Screening System

### Installation Diagram

- A type rack and pinion Screening system is widely used in interior and exterior Screening system in multi span greenhouses; this system always has stable and reliable performance.
- Application:  
Interior and exterior Screening system.

**Working Principle:**

Gear motor drives the pinion by the drive shaft to move the rack back and forward; the rack is connected with the handspike sitting on the supporting wheel, so the Screening movement is realized by reciprocating movement of the handspike to open or close the Screening system.

### 3/ Cable Driving Screening System

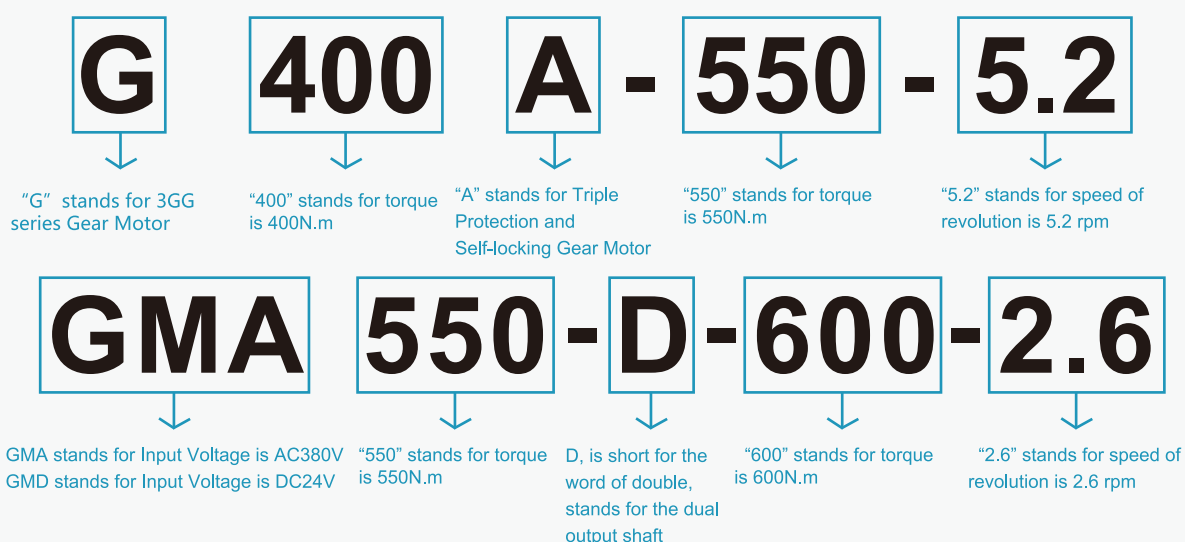

#### Installation Diagram

- B type rack and pinion Screening system is widely used in interior and exterior screening system in multi span greenhouses; this system always has stable and reliable performance.
- Application:  
Interior and exterior screening system.

**Working Principle:**

Gear motor drives the pinion by the drive shaft to move the rack back and forward; the rack is connected with the handspike sitting on the supporting wheel, so the screening movement is realized by reciprocating movement of the handspike to open or close the screening system.

### 4/ Model Naming Demostration

# KINGZO® / 3GG®

# Gear Motor

## Gear Motor Introduction

Brand Series	3GG series, Kingzo series
Specification series	By Power (W):150-1500 By Torque(N.m):150-1200
Function series	Window opening series, Screening series

### Defination

The Gear Motor is a kind of power transmission mechanism, using the speed converter to decelerate the speed of the motor to the required speed and get a larger torque mechanism.

### Application

- Window Opening: It drives the window opening system of greenhouse or barn to realize the control of window opening and closing degree.
- Screening: Drive the curtain and shading system of the greenhouse or livestock, realize the retractable control of the screening and the shading net.

### Development history timelines

- In 2013, Kingzo trademark was registered and our own reducer was launched.
- In 2015, Kingzo gear motor for livestock was launched
- In 2016, 3GG trademark was registered
- In 2018, 3GG Gear motor was launched on the market
- In 2019, There are 5 patents related to 3GG (Patent No. ZL2020200879077, etc.)
- In 2020, 3GG triple-proof self-locking speed Gear motor launched

### Common transmission structure of Gear Motor

● Domestic C1 type

● Domestic C2 type

● Foreign L type

● Foreign R type

● Fenglong 3GG type

# 3GG<sup>®</sup> Gear Motor

## 1/ 3GG<sup>®</sup> Gear Motor

### Product Description

- Self-locking performance is excellent, braking distance is less than 10mm;
- Limit control failure rate decrease to 0.5%;
- Additional overload protection and power phase loss protection function;
- Additional manual opening and closing device;
- 3 years quality guarantee.

## Triple Protection and Self-locking Gear Motor<sub>(three-phase)</sub>

### 1/ 3GG® Triple Protection and Self-locking Gear Motor

#### Product Description

- **Savings on distribution material costs**  
Multiple Gear Motor can be connected in parallel with a group of power lines, and control lines can also be shared. Protecting the limit control system, reducing the rate of motor burnout.
- **No special control box required**  
Easy wiring, only need to connect to the three-phase power cord for normal use.
- **Adjustable limit for one person**  
Manual / automatic dual mode control, 1 person can operate, saving manpower. Manual mode, with a manual switch directly off, Automatic mode, remote control via external switch.
- **Phase Loss Protection, Wrong Phase Protection**  
Protecting the limit control system, reducing the rate of motor burnout.
- **Manual opening and closing device for power failure**  
No concern that the system will still need to be turned on and off after a power outage. Manual opening and closing device for power failure.
- **Excellent self-locking performance**  
Final stage worm gear design, braking distance less than 10mm. Fully meets the high precision requirements of window opening systems. Failure rate of Limit Control is less than 5%.

## Triple Protection and Self-locking Gear Motor (Single phase)

### 1/ 3GG®Triple Protection and Self-locking Gear Motor

#### Product Description

- **Savings on distribution material costs**  
Only need 220V AC , and it can be used when connected
- **Saving on distribution material cost**  
No need control box, only one power cord is needed, which is convenient and cost-effective
- **Adjustable limit for one person**  
Manual / automatic dual mode control, 1 person can operate, saving manpower. Manual mode, with a manual switch directly off, Automatic mode, remote control via external switch.

- **Phase Loss Protection, Wrong Phase Protection**  
Protecting the limit control system, reducing the rate of motor burnout.
- **Manual opening and closing device for power failure**  
No concern that the system will still need to be turned on and off after a power outage. Manual opening and closing device for power failure.
- **Excellent self-locking performance**  
Final stage worm gear design, braking distance less than 10mm.Fully meets the high precision requirements of window opening systems.Failure rate of Limit Control is less than 5‰.

## 150/120 N.m GMA Series

### 1/ Kingzo® Gear Motor GMA150-D/ GMA120-D

#### Product Description:

- Dual output shafts;
- Prevent leaning due to the long rolling tube;
- Big torque, rolling more film, lower cost;
- Powered by AC220V/AC110V, no need transformer, more convenient to install, lower cost;
- Three water drain holes of anti-condensation added to protect the safety of circuit diagram, Protection Grade: IP55;
- Reinforced output shaft;
- Providing 3 meters long external electric cable for easy connection to the control box;
- 3 years quality guarantee.

2/ Kingzo® Gear Motor GMA150-D-12/GMA120-D-12 (Specially designed for windows opening )

Product Description:

- Specially designed for small area windows ventilation to replace big power gear motor;
- High control accuracy and high repeat accuracy;
- Braking distance less than 10mm;
- The simple limit control device;
- Connected to AC220V power directly and save cost;
- With drainage holes, Protection Grade: IP55;
- 3 years quality guarantee.

3/Kingzo® Gear Motor GMA150-D-K/GMA120-D-K (Specially designed for small greenhouse screening )

Product Description:

- Specially designed for small area screening system, replace high power gear motor
- Anti-misconnection, anti-overload protection
- Low noise, high torque
- High precision of limit switch, great self-locking
- Directly connected to AC 220V power supply, cost-effective
- Provide 5m external power cable, convenient to connect to the control box
- With anti-condensation drainage holes, Protection Grade: IP55 (dustproof and waterproof)
- Three years guarantee

## 1/ Kingzo® Gear Motor (250/200N.m)

### Product Description

- Excellent self-locking performance,braking distance is less than 10mm ;
- IP Grade 65, Higher dust protection grade ;
- Release Function,in the event of a power failure,the emergency opening and closing can be completed manually in a short time ;
- Adding position sensor distance control module to make the control more intelligent and convenient ;
- Compact structure, small size, light weight ;
- Provide 5 meters external power cord, convenient to connect the control box, safe and reliable.

04

2/ 008 Washer

Product Code	Model	Unit
140500500030	DP-A45	set

Note: Used for A type screening pinion.

2/ 009 Anti-slip Clip

Product Code	Mode	Specs	Unit
140500600030	KJ-A	For A type pinion	piece

Note: Mounted on the A type pinion input shaft for easy drive shaft installation and removal

3/ Accessories For Cable Driving Screening System

- 001. Winding drum
- 002. Bearing plate
- 003. Aluminum drive clip
- 004. Suspension wheel
- 005. Reversal Pulley

04

3/ 001 Metal Winding Drum/Plastic Winding Drum

Made of galvanized steel, used for 2" shaft, 3 pcs of screws

Used for 1" shaft, used for small area of screening system.

Product Code	Model	Specs	Unit
141001200030	RXT-70	Φ70x120	piece
141001000030	SSP-76-1	Φ32,4m	piece
141001100030	SSP-76-2	Φ32,6m	piece

3/ 002 Bearing Plate

Product Code	Model	Specs	Unit
140200100030	SSP-21-1	1" Nylon bearing, 2 splints	piece
140200200030	SSP-21-2	2" Nylon bearing, 2 splints	piece

Note: Used for supporting the drive shaft.

3/ 003 Aluminum Drive Clip

Product Code	Model	Specs	Unit
141005400030	SSP-10	L=30	piece

Note: Made of aluminum alloy material, used for connecting cable and the leading edge profile.

3/ 004 Suspension Wheel

Product Code	Model	Specs	Unit
141004200030	SSP-68	Double wheel	piece

Note: Used for guiding the driving cable.

3/ 005 Reversal Pulley

Product Code	Name	Unit
141003100030	Reversal pulley	piece

Note: Used for the reversal of the driving cable.

3/ 006 Cone Winding Drum

Product Code	Model	Specs	Unit
640100100430	Cone winding drum(6")	3/4"	piece

Note: Used for livestock house.

3/ 007 Bearing Plate

Product Code	Model	Specs	Unit
140200300030	SSP-22-1	1"	piece
140200400030	SSP-22-2	2"	piece

Product Code	Model	Specs	Unit
140200500030	SSP-23-1	1"	piece
140200600030	SSP-23-2	2"	piece

Note: In the screening system, supporting the drive shaft, it can distribute shaft torque and reduce load of drive shaft.

4/ Economical Screening System

4/ 001 Aluminum Pipe

Product Code	Model	Specs	Unit
140400900030	QDLG-19x1.2Y	Φ19x1.2mm	m

Note: It could replace the leading edge profile, cost efficient and durable.

4/ 002 Plastic Connector

Product Code	Model	Specs	Unit
140410600030	SSP-19	Φ19	set

4/ 003 Plastic Screen Folder

Product Code	Model	Specs	Unit
140901000030	SSP-32	Φ19	piece

Note: Used for working with the pipe, fixing the shading net.

4/ 004 Steel Screen Folder

Product Code	Model	Specs	Unit
140901100030	SSP-33	Φ19	piece

Note: Made of high flexible stainless steel, no distortion.

4/ 005 Screen Clip

Product Code	Model	Specs	Unit
140901800030	SSP-42	Φ19	piece

Note: Used for fixing the shading nets to 19mm pipe.

#### 4/ 006 Plastic Screen Clip

Product Code	Model	Specs	Unit
140902100030	SSP-46	Φ19	piece
140902000030	SSP-47	Φ19	piece

Note: Used for fixing the shading nets to 19mm pipe and polyester wire.

#### 4/ 007 Stainless Steel Clamp

Product Code	Model	Specs	Unit
770100400030	SSP-80-1	Φ19,13mm	piece
770100500030	SSP-80-2	Φ19,38mm	piece

Note: Used for fixing the shading nets to 19mm pipe and polyester wire.

#### 4/ 008 Double Screen Clip

Product Code	Model	Specs	Unit
140901900030	SSP-43	Φ19	piece

Note: Used for fixing the driving cable to the pipe.

#### 4/ 009 Tube Clamp With Screwing

Product Code	Model	Specs	Unit
141005500030	SSP-44	Φ19	piece

Note: Used for fixing the driving cable to the pipe.

#### 4/ 010 Screen Stopper

Product Code	Model	Specs	Unit
140901200030	SSP-34	stainless steel	piece

Note: Used with truss clamps, stainless steel material, high flexible.

#### 4/ 011 Aluminum Saddle Clamp

Product Code	Model	Specs	Unit
140902300030	SSP-09	Φ19,L=21	piece

Note: Used for working with the aluminum drive clip or the table clamp.

5/ General Accessories for Screening System

5/ 001 Screening Net Weight

Product Code	Model	Specs	Unit
140801700130	YPZ-503	Φ50	set

Note: Used as balance weight on the edge of screening nets, wind proof.

5/ 002 Fixing Spring(interior use)

Product Code	Model	Unit
140900100030	DWH-N	piece

Note: Used for guiding polyester wire on leading edge I, V.

5/ 003 Plastic Peg

Product Code	Model	Unit
140802300030	SSP-53	piece

Note: Used for working with steel wire and screening net.

5/004 Clamps for Supporting Wheel

Product Code	Model	Specs	Unit
141105100030	GLBG-6040	60*40 ( Vertical )	piece
141105300030	GLBG-5050	50*50	piece
141105200030	GLBG-4060	40*60 ( Horizontal )	piece
141105400030	GLBG-4040	40*40	piece

## 5/005 S Screen Hook

Product Code	Model	Unit
140801900030	SSP-36	piece

Note: Connecting the edge of shading net to the wire.

## 5/006 S Hook

Product Code	Model	Unit
140802000030	SSP-37	piece

Note: Connecting the edge of shading net to the wire.

## 5/007 Polyester Wire

Product Code	Model	Name	Clor	Dia	Specs	Unit
140800600030	SSP-70-1	Polyester wire	Black	Φ2.2	1900m/roll	roll
140800500030	SSP-70-2	Polyester wire	clear	Φ2.0	2300m/roll	roll
140803600030	SSP-70-4	Polyester wire	clear	Φ2.3	2300m/roll	roll

Note: Used for shading system to hold and cover the shading nets, made of polyester, strong tensile strength, long life span.

## 5/008 T Bolts

Product Code	Specs	Unit
140802600030	M6*75	piece
140802500030	M6*40	piece

Note: For greenhouse use.

5/009 Motor Bracket

Used for connecting Gear Motor with greenhouse frame

Product Code	Model	Unit
130800100030	DJZ-KLWJ	piece

5/010 Sash Bracket

Note: Used for the connection of rack and vent frame.

Product Code	Model	Unit
130900600030	XMZ-LZ	set

5/011 Aluminum Leading Edge

Product Code	Model	Specs	Unit
140400100030	SSP-01	6m / Piece	m

5/012 Edge Connector

Used for extended connection

Product Code	Model	Unit
140410100030	XCJB- 1	set

5/013 Exterior Fixing Spring

304 Stainless Steel, Used for Polyester Wire and Aluminum Leading Edge I & V

Product Code	Model	Unit
14090900030	DWH-WA	piece

5/014 Table Clamp

Product Code	Model	Unit
141103100030	Φ 27	piece
141103200030	Φ 32	piece

## 5/015 Bracket For Bearing Plate

Product Code	Model	Unit
140201000030	ZJ- SSP- 21- 2	piece

Used together with 2' ' bearing plate.

## 5/016 Stainless Steel Wire Peg

Product Code	Model	Unit
140800800030	SSP- 16	piece

Used for fix the screen net.

## 5/017 Steel Cable Clip

Product Code	Model	Unit
584000200030	5mm, Malleable iron clamp	piece
584000100030	3mm, Malleable iron clamp	piece

## 5/018 Small Pulley

Product Code	Model	Unit
141004100030	SSP-64	piece

04

## 5/019 Rack Arm

Product Code	Model	Length	Thickness	Unit
140600100030	CTLM-2.752965	L=2965	2.75mm	piece
140600200030	CTLM-2.753965	L=3965	2.75mm	piece
140600300030	CTLM-2.754965	L=4965	2.75mm	piece
140600700030	CTLM-3.02965	L=2965	3.0mm	piece
140600800030	CTLM-3.03965	L=3965	3.0mm	piece
140600900030	CTLM-3.04965	L=4965	3.0mm	piece

Note: Other length could be tailor made on request.

5/020 Pulley with Ball Bearing

Product Code	Model	Specs	Unit
141002100030	SSP-65-80	φ80	piece
141002200030	SSP-65-100	φ100	piece

Plastic pulley has a good anti-friction capability, ensure long life span

5/021 Wire Strainer

04

Model: Stainless ratchet wheel strain clamp

Model: Hot galvanized strain clamp

Product Code	Model	Specs	Unit
141000100030	Stainless steel ratchet ring type wire tensifier	SSP-72-1	piece
141000300030	Hot galvanized strain clamp	SSP-72-2	piece

5/022 Bearing Plate

1" bronze insert

5/4" bronze insert

1" nylon insert

Product Code	Model	Specs	Unit
140200800030	SSP-31-1	1" bronze insert, straight	piece
140200900030	SSP-31-2	5/4" bronze insert, straight	piece
140200100030	SSP-21-1	1" Nylon insert, 2 pcs straight	piece

Note: Used for holding shaft, good anti-friction capability, long life.

### 5/023 Reversal Pulley

Product Code	Model	Specs	Unit
141002000030	HXL- SY	pitch 60-70mm	piece

Used for driving cable reversing

### 5/024 Aluminum Tube Coupler

Product Code	Model	Unit
140410700030	JT-ODLG19, $\phi$ 19	set

Used for  $\phi$ 19mm aluminum tube connection

## FLC® Inflation Blower

### 1/ FLC® Centrifugal Inflation Blower

#### Product Description

- The product is composed of the turbo, the propeller and low noise motor etc;
- The propeller is designed as multi winged, Insulation Protection IP45;
- Stable performance, low noise, big air flow capability;
- Compact and easy to repair;
- Thermal protector built in;
- Adopting oil retaining roller bearing;
- CCC and CE certified;
- Motor frequency 50Hz;
- 3 years quality guarantee.

05

#### FLC® Centrifugal Inflation Blower Product Photo and Parameter

FLC-LCF/140A

FLC-LCF/140

Product code	Model	Air Flow	RPM	Frequency	Voltage	Electricity Current	Power	Thermal Protection	Adjustable Pressure Range	Unit
160100800010	FLC-LCF/140A	310m³/h	2190r/min	50Hz	220V	0.5A	70W	yes	50-200Pa	piece
160100400010	FLC-LCF/140	310m³/h	2190r/min	50Hz	220V	0.5A	70W	yes	/	piece

Note: Inflatable area of about 800m², inflation pressure between film is appropriate at 80Pa .

2/ FLC® 95B-1 Centrifugal Inflation Blower

Product Description

- Environment Temperature≤55℃, Insulation Grade B, Insulation Protection IP45;
- Stable performance, low noise, big air flow capability;
- Thermal protector built in;
- Adopting oil retaining roller bearing;
- 20000 hours long continuous working life;
- CE certified;
- 3 years quality guarantee.

Product code	Model	Air Flow	RPM	Frequency	Voltage	Electricity Current	Power	Weight	Thermal Protection	Unit
160100100010	FLC-LCF/95B-1	150m³/h	2350r/min	50/60Hz	220V	0.19/0.23A	12W	1.5kg	yes	piece

Note: Inflatable area of about 400m², inflation pressure between film is appropriate at 80Pa.

05

3/ FLC® Centrifugal Inflation Blower Accessories

Product code	Model	Unit
160200600010	CQFJPJ-LXZ-140A	set

Accessories include Air inlet 1, Air inlet 3, Air inlet 4, Φ76A Aluminum hose 1.5meters, 1 installation bracket, Metal hose clamps, Bolts and nuts.

Product code	Model	Unit
160200900010	CQFJPJ-LXZ	set

Accessories include Air inlet 1, Air inlet 2, Φ76A Aluminum hose 1.5meters, 1 installation bracket, Metal hose clamps, Bolts and nuts.

## Greenhouse Special Accessories

### 1/ Sunny® Roof Vent

#### Product Description

- With specially designed tube clamps, it is very easy to install to the greenhouse structure
- Special profile is designed in vent frames, conveniently to fix the film by wiggle wire
- Specially designed gutter connector to the end of the vent frame, convenient drainage
- Big vent area, three opening angles are available
- good self-locking capability

Product Code	Specification	Size	Unit
250100600010	BMC-9060Z	600mmx900mm	Set
250100300010	BMC-13060Z	600mmx1300mm	Set
250100100010	BMC-15060Z	600mmx1500mm	Set

Note: It is mainly used for Solar Greenhouse, Tunnel, Gutter connected greenhouse. It is pre-assembled in aluminum frame with rope-pulling open close mechanism, easy operation and installation, size can be customized

### Sunny® Sliding Door for Film Greenhouse Application

# Other Greenhouse Accessories

## Greenhouse Special Accessories

### 1/ Patch Tape

Product Code	Model	Specification	Thickness
100500300250	BMJD10-7005	70mmx5m	0.10mm
100500300350	BMJD10-7015	70mmx15m	0.10mm
100500300450	BMJD10-10015	100mmx15m	0.10mm
100500900030	BMJD12-7015	70mmx15m	0.12mm
100500800030	BMJD12-10015	100mmx15m	0.12mm

Note: Widely used on EVA film, PE film, PVC film etc. to fix the damages of agriculture film. It is highly adhesive and water proof. It has high light transmission.

### 2/ Brace Band

06

Brace band using photo

Product Code	Model	Material	Specs	Thickness	Unit
240800100030	YKG-2212	Hot galvanized	Φ22	1.2mm	piece
240800200030	YKG-2515	Hot galvanized	Φ25	1.5mm	piece
240800800030	YKG-3220	Hot galvanized	Φ32	2.0mm	piece
240800700030	YKG-6020	Hot galvanized	Φ60	2.0mm	piece

Note: Used for connecting with the round pipe.

### 3/ Pipe Strap

Product Code	Model	Specification	Thickness	Unit
240802100030	BYKG-25	Φ25	1.2mm	piece
240802200030	BYKG-32	Φ32	1.5mm	piece
240802300030	BYKG-50	Φ50	2.0mm	piece

Note: Used for connecting to the pipes.

#### 4/ Single Groove Tube and Coupling

Single Groove Tube

Coupling

Product Code	Name	Model	Specs
130601700030	Single Groove Tube	JMG-DCY-3000	Φ50
130601000030	Coupling	LJJ-DCJMG	L=250

Note: The Single groove tube is used to roll plastics, screen and soft material;  
The coupling is used to extend and connect the tube.

#### 5/ Double Grooves Tube and Coupling

Double Grooves Tube

Coupling

Product Code	Name	Model	Specs
130600600030	Double Grooves tube	JMG-SCY-6000	Φ50
130601200030	Coupling	LJJ-SCJMG	L=250

Note: The Double grooves tube is used to roll plastics, screen and soft material;  
The coupling is used to extend and connect the tube.

#### 6/ Greenhouse Band (Webbing Rope)

Product Code	Model	Specs	Unit
120700200050	YMX-3H	300m/roll	roll

Note: Tensile strength, low thermal expansion and contraction coefficient, add anti-aging additives, longlife span.

#### 7/ T Clamp

(Used for junction of round pipes)

Product Code	Model	Specs	Unit
240805100030	TXQ-48	Φ48xΦ48	set

#### 8/ Wiggle Wire Channel Connector

Product Code	Model	Specs	Unit
120230200010	NJP-3	KF-3	piece
120230300010	NJP-4	KF-4	piece

Note: Used for connecting LOCKUP® galvanized wiggle wire channel.

#### 9/ Purlin Bow Clamp

Product Code	Model	Specs	Unit
240804100030	GQ-3333	33.4x33.4 (1.315" x1.315" )	set
240804200030	GQ-4233	42.16x33.4 (1.66" x1.315" )	set
240804300030	GQ-4833	48.26x33.4 (1.9" x1.35" )	set

Note: Made of galvanized steel sheet, used for cross connection of the pipes or for multi-span greenhouse.

10/ TOYOTANI® Protection Film

Product Code	Model	Specs	thickness	Unit
100165100010	LM490C	10cm*400m	0.10mm	roll
100165200010	LM590E	10cm*300m	0.20mm	roll

11/ Film Hoop

Product Code	Model	Specs	Unit
120800100030	SSP-15-22	Φ22	piece
120800200030	SSP-15-25	Φ25	piece
120800300030	SSP-15-32	Φ32	piece

12/ Film Protector Strip

06

Product Code	Material	Specification	Unit	Guarantee
120904000030	Rubber	20m	Roll	6 years
120904100030	Rubber	50m	Roll	6 years

13/ Single Groove Tube

Product Code	Material	Specs
130602000030	cold rolling steel	φ34, L=4000mm

Office Add: 3<sup>rd</sup> Floor National Center for Crop Germplasm Conservation,
